

Meet the world's most advanced operating system. Again. Instantly find what you're looking for. Get information in an instant with a single click. Mac OS X Tiger delivers [200+ new features](#) which make it easier than ever to find, access and enjoy everything on your computer. Upgrade your Mac for \$129.

Spotlight. Experience the breakthrough new desktop search technology that finds anything on your computer as quickly as you type. Search your entire system from one place: Files, images, emails, contacts, calendars and applications appear instantly.

Start a Revolution on Your Desktop

Mac OS X Tiger will change the way you use a computer. Breakthrough search technology, stunning [graphics and media](#), unparalleled [connectivity](#), an intuitive [user interface](#) and a virtual toolbox chock full of cleverly integrated features — all atop a rock-solid [UNIX foundation](#) — give you the most innovative, stable and [compatible](#) desktop operating system on the planet. Period.

Find Anything, Fast

Tiger introduces [Spotlight](#), the lightning-fast search technology that illuminates every corner of your Mac, displaying results as fast as you type. Search everything on your system: Files, emails, contacts, images, movies, calendars and applications appear instantly. Just as you find songs on [iTunes](#) by name, artist or album, Spotlight results take you way beyond mere filename and location: They include all the metadata inside files — the “what, when and who” of everything on your Mac — including the kind of content, the author, edit history, format, size and many more details.

Organize Instantly

Because Spotlight is built right into the core of Mac OS X, it automatically updates results whenever files change, giving you countless new ways to organize your Mac. Save search results as a [Smart Folder](#) that automatically updates itself. Set up Smart Mailboxes according to Spotlight search queries and [Mail](#) files away

This Tiger Roars and Scores

From Walt Mossberg (“The best and most advanced personal computer operating system on the market.”) to David Pogue (“The classiest version of Mac OS X ever.”) to Mike Wendland (“One Cool Cat.”), reviewers heap praise on Mac OS X v10.4 Tiger.

[More reaction...](#)

your messages for you. Create [Address Book](#) Smart Groups using Spotlight search results. Even drag and drop Spotlight searches into new [Automator](#) Workflows to automate repetitive tasks. Everything on your Mac gets a chance to shine.

Get Info in a Dash

The new [Dashboard](#) hosts nifty mini-applications called widgets that appear instantly and keep you up to date with timely information from the Internet. View stocks, check weather forecasts, track flights, convert currency and units of measure, even look up businesses in the phone book. Similar to [Exposé](#), the Dashboard zooms across your Desktop at the click of a function key. Your favorite widgets appear with up-to-the-second information, then disappear just as easily, so you can get back to what you were doing.

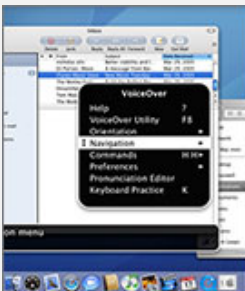

[Dashboard](#). Zooming to the top of your Desktop with the click of a function key, Dashboard, like [Exposé](#), disappears just as easily. Use Dashboard to access nifty new mini-applications called widgets.

Make a Connection

Tiger turns your Mac into a communications hub. [Safari RSS](#) for Tiger features built-in RSS feed detection and display. Mail and Address Book incorporate Spotlight technology to help you organize your contacts and correspondence. And [iChat AV](#) lets you video conference, audio chat or send instant messages with friends and colleagues. Add a [Mac account](#) and make the most of Tiger connectivity with iDisk storage, a mac.com email address, your own home page and powerful syncing capability.

Feature of the Week: [VoiceOver Accessibility Interface](#)

Your Mac Speaks Up

Mac OS X Tiger includes a variety of accessibility features. The most vocal of these features is VoiceOver, which offers visually impaired individuals magnification options, keyboard controls and a spoken English description of what's happening on screen. VoiceOver can read web pages, Mail messages and word processing files. And it's available out of the box. Just press Command-F5 for the VoiceOver QuickStart.
